Flagship virtual conferences

UKA Live - bespoke thought leadership

UKA Inform - round tables & research

UKAuthority virtual conferences - your customer success platform

UKAuthority's 2022 and 2023 events will take place in a virtual format - offering our national community of digital, data and technology leaders equal access to the shared experience and learning sessions.

Our flagship events offer a customer success and engagement platform to suppliers leading the sector with innovative solutions.

Each comprises three 90 minute webcasts, 11:00 to 12:30, on three consecutive mornings, each featuring four to five speakers and a panel discussion.

We ask our partners to bring their public sector customers to speak alongside them - evidencing success and outlining ambitions for the future.

We can accommodate a maximum of four partners:

- ▶ One x Gold
- ▶ Two x Silver
- ▶ One x SME

Leadership and research

UKA Live

UKA Live is the prime discussion channel covering the use - and future use - of digital, data and technology in the health and public sector.

This fully managed webcast production service includes branding, spokesperson on panel, promotion, social media support, audience acquisition, project management, moderation, broadcast, news story, post-production and hosting of on-demand recording on UKAuthority.

Post event we craft a thought leadership feature by-lined to your spokesperson for publication on UKAuthority and promotion via our newsletters and on social media channels.

We can also record talking heads interviews with your customers and representatives, post broadcast, to capture their success stories and key thoughts on the topic in hand.

UKA Inform

UKAuthority runs virtual round table debates and in-depth research programmes with key partners.

Full details of recent projects can be seen under Inform on UKAuthority, but these include a focus on data, purchasing, intelligent automation, low code, digital transformation, cloud, health and social care, and both sustainable technology and the use of technology to improve our environment.

Projects range from virtual round tables to online surveys and interviews producing features, briefing notes and white papers.

UKAuthority's Focus

- ▶ Sustainable technology and the environment
- ▶ Data-driven innovation
- ▶ Artificial intelligence and machine learning
- ▶ Automation and added intelligence
- ▶ Digital inclusion, connected communities
- ▶ Hybrid and beyond, cloud into the future
- ▶ IoT, sensors, smart places and smart cities
- ▶ Low code and self sufficiency
- ▶ Platforms and common components
- ▶ Reuse, collaboration and shared services
- ▶ Modern citizen services
- ▶ Digital identities
- ▶ Standards for multi-sector services
- ▶ Patient centred digital health and care
- ▶ Secure home-office hybrid working
- ▶ Cyber resilience and security
- ▶ Procurement in a fast moving digital world
- ▶ Diversity and women in public sector DDaT
