

# Birmingham Children's Trust & Sentinel Partners: Improving Lives through Integrated Data Insights

helena.zaum@sentinelpartners.co.uk

# Improving lives through trusted data insights

### What we do

We help public sector organisations get faster value from their data, and data from their agency partners

We get your data ready for your Al journey

We have deep industry specialism around highly sensitive use cases and information governance

Mental health status Substance misuse etc

#### Personal details

DOB, address, interests

### Social care info

Social worker, last assessment, gang membership, missing episodes

# Single View (s) of Young Person e.g. for social worker

#### School/NEET

Attendance, academic performance, mental health support

### Police & youth justice

Previous convictions, persons of interest

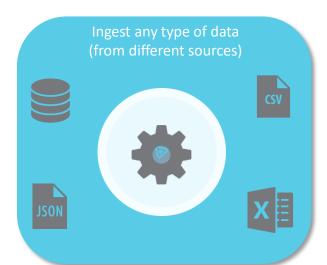

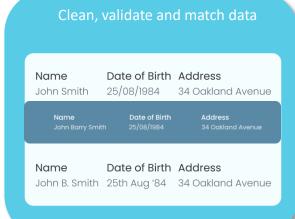

#### Household info

Parents/carers, financial information, issues of concern e.g. domestic violence

### Sentinel Platform

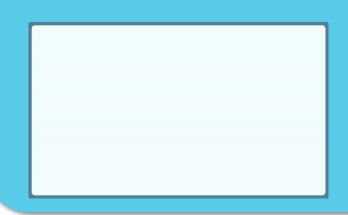

#### Share Insights

### Example use cases

Predicting looked after children

Predicting perpetrators of domestic abuse

Identifying financial & other vulnerabilities

Multi-agency safeguarding/MASH

Supporting Families 3

Identifying unpaid carers & likely breakdown

Prioritising those waiting for assessments

Preventing escalations e.g. falls

Single view of care tech devices

Anticipating provider quality & financial risk

Coordinated hospital discharge

Single view of med tech devices

Family hubs - care coordination

Admission avoidance

Multi agency approach to population health

Visibility of individuals across multiple data sets: issues identified earlier

Much improved multi-agency collaboration: improved outcomes for individuals and their loved ones

Easy to
demonstrate
compliance &
manage
inspections (e.g.
Ofsted)

Elastic data
platform which
can support
many different
areas of priority

#### **Outcomes**

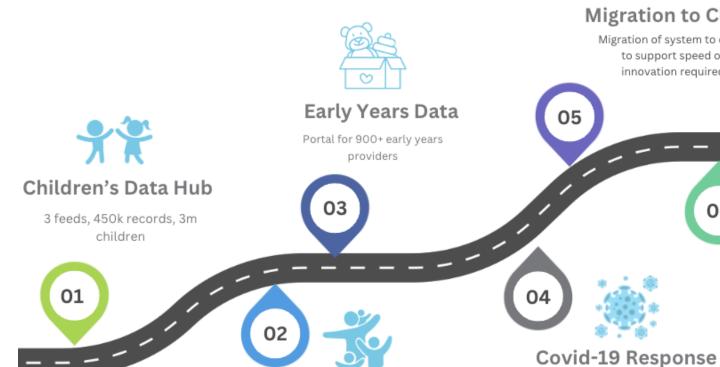

Dan Taylor, Birmingham Children's Trust

Birmingham Children's Trust **Data Journey** 

Dashboards for senior management & to support decision making

Troubled Families 1 & 2

First multi-agency data

Migration to Cloud Migration of system to cloud to support speed of innovation required

Rapid identification of shielded people - or those

who should shield

#### **Supporting Families 3**

Additional feeds from education & health to support SF 3. Secured maximum available funding. 5.4m records, 2.6m individuals

#### Benefits

## Full draw down on government funding

Ability to evidence both interventions and improved outcomes for children and families

#### Holistic approach to service delivery

A joined up approach to how services are delivered to children and families

## Improved multi-agency coordination

It's much easier to work with other place based partners as everyone has access to good data

## Improved data quality and insights

Our data quality has improved and we are much better prepared for innovation and Al

## **Lessons learned**

Start small, build over time

Engage IG early & bring them along with you

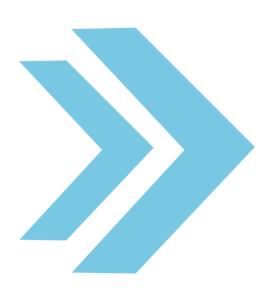

Start with the outcome in mind

Don't underestimate the level of business & cultural change needed to become data-led

Be prepared for changes to practice as insights emerge

Digital Economies Act 2017

### **Future Plans**
