

Integrating Digital Health and Care 2024

Our progress and priorities

Our Key Digital Priorities

- National Digital Platform
- Digital Front Door
- Integrated Record
- Delivered new CHI system
- Launched Shared ARC Centre

Shared Alarm Receiving Centre

Reduced technical burden.

Cost savings through a collective approach to procurement and implementation.

Provides a scalable and resilient solution.

Greater influence over the solution supplier.

Lower carbon impact.

Greater support for remote working.

Supports better data sharing

Enables collective approach to challenges.

Enables better use of data

Our Data Strategy

To empower the people of Scotland by giving individuals clear and easy access to, and the ability to manage and contribute to, their own health and social care data where it is safe and appropriate to do so.

To empower those delivering health and social care services to have the confidence and ability to gather, safely use, and share data to sustainably improve services and ensure outcomes are being met.

To ensure fit for purpose data is readily accessible through secure and safe means for planning, research and innovation. Data will be used for the benefit of individual wellbeing and the public collectively, including the development of new and innovative ways of working, improving care, developing new treatments and technologies.
